## International Presence

- Gat Fertilizers operates in dozens of markets around the world and markets with the premium own brand fertilizer "GATIT". Our international activity is based on the success and experience we have gained in Israel and in Spain.

## Promoting Knowledge in the Field

- In line with the company's vision and commitment to enriching our clients' professional knowledge, we have founded "Gat Academy".
- The course has already received many positive reviews, and provides a wide range of professional information to its participants in the field of fertilizing and watering.
- The course is taught by experienced professionals at the highest level, made up of members of the company's agronomical team, as well as external experts.

Committed to your Success!

## GAT FERTILIZERS – THREE DECADES OF COMMITMENT

In 1985 the company founded its first plant in Kiryat Gat for the production of liquid fertilizer. This plant, together with the top professional and logistical service provided alongside it, created a new standard in the field of products and services available to Israeli farmers. Following the success of the first plant, a second plant was founded in 1992 in the north of Israel that eventually moved to its current location in the industrial zone of Alon Tavor.

In 1993 Gat's activities expanded again and entered the international market when the first plant outside of Israel was founded – “Gat Fertiliquidos” in Seville, Spain. Later, two additional plants were founded in the Iberian Peninsula, a plant in Extremadura, and a plant in Almería. Together this set of plants serves vast agricultural lands in Spain.
